

Guilherme Oliveira

A: 238 Martin Pescador, Joinville / SC, Brazil
T: +5504796622619
E: ghophp@gmail.com

Key Skills

- Mobility from backend to frontend and vice versa
- Multiplatform Java (Android, Desktop, Web)
- Language-agnostic (python, java, php, javascript, etc..)
- Hungry to learn and experience

Employment History

Coderockr Startup (2014 - Present)

Software Engineer

Working with some cool apps for the web and Android, in a very productive methodology that aggregates some pieces of Scrum and others from Kanban. Here I can face the challenge that is develop high level systems.

Five Int'l Systems LTDA (2014 - Present)

Co founder and Software Engineer

Starting this year (2014), Five closed his first contract with APM Terminals, one of the biggest companies in port management globally. Five is specialized in OCR (Optical Characters Recognition) solutions, which is basically big structures composed by cameras, scanners and embedded computers to track the license plate and containers code of who enter cargo areas.

Freelancer (2010 - Present)

Software Engineer and Consultant

I am always doing some freelance to keep in touch with different experiences and people, also, raise some money to invest on some idea. This was a busy year, so I did just a few projects as a freelancer, basically some Android apps and few institutional websites. You can check it out at my portfolio: <http://ghophp.github.io/>

Humantech KM (2009 - 2014)

Team Leader

So many experiences acquired at this company. Really helped me to discover that I am passionate by research and development. I was always looking for a new challenge, always trying to learn something new, and they offered me one every day. The knowledge that I gained here is priceless, I started as a trainee and ended with my own team.

Personal Statement

Seems that I have just six years of experience. Although, on those six years, on a normal week, I did an average of eighty hours of work. You can discount something about sixty days of vacation, sum all those hours and see that I have a nice background.

I am passionate by technology, but most of all, I am passionate by succeed. If you can offer me a north, that I can pursue, I will do that, with all my efforts to achieve the objective. And all that path will be enjoyed with the same appreciation as the final point.

Educational History

Master Degree in Applied Computer Cience

(2014 - Locked) - UDESC

After finishing college I enrolled to master's degree in one of the references universities in technology. Although, I didn't fit very well on my line of study (image processing), and after a semester, really valuable because of the research techniques, I ended up locking my enrollment.

Bacharel in Information Technology

(2009 - 2013) - UNISOCIESC

College was an amazing experience, both professional and personal. I meet a lot of people that became friends and customers. I won the prize of Best Final Paper of 2013 which was really important to ease the entrance on master's degree.

Computer Technical

(2007 - 2009) - SENAI

At sixteen years old, I started in parallel with the high school, a two years technical course, which gave me north, both on life and technology business.

Hobbies and Interests

Play with Arduino and another electronic stuff. I will one day be the co founder of a startup focused on vintage vending machines.

Travel with my wife. I should do this more often, but as you could realize till this point of my resume, time is something very rare.

Series, series everywhere. And movies too. I am a big fan (and critic) of the seventh art.

Basketball, this is my sport. I do love the feeling of a competition, all the toughness, the friction, and at the end, the friendship.
